

# NAD+

NICOTINAMIDE ADENINE DINUCLEOTIDE

***NAD is our premier drip for  
ENERGY, BRAIN AND ANTI-AGING.***

NAD+ fuels your cells. Intravenous NAD+ powerfully improves cellular function and stimulates biogenesis of new mitochondria. Mitochondrial function declines with stress, toxicity, infection and age.

Now you have a tool to reverse this process.

NAD+ has been shown to help most neurodegenerative diseases, has anti-aging properties, and aids in athletic recovery as well as performance.

## **NAD+ IV Therapy Helps Combat:**

- Addiction
- Anxiety/depression
- Chronic fatigue
- Diabetes
- Depression
- Fibromyalgia
- Heart disease
- Memory/concentration issues
- Mitochondrial dysfunction
- Multiple sclerosis
- Parkinson's disease

For the best possible results and overall therapeutic effect of NAD+ infusions, we recommend our 4-series of 550mg NAD+ drips within 1 - 2 weeks of each other, as this time frame allows for the ideal therapeutic effect.

## **PRICING**

**\$275**  
for 250g

**\$525**  
for 550g

# Why People Choose NAD+ IV Therapy

NAD+ plays a crucial role in all of the body's major processes, so it's vital to have normal levels of NAD+.

## Reduce Chronic Fatigue

NAD+ produces Adenosine Triphosphate (ATP), the energy source of the body. Increased levels of ATP can boost energy levels and reduce feelings of fatigue.

## Improve Cognition

NAD+ has protective and stimulatory effects on neurons in the brain. This has the potential to enhance memory, improve concentration, and enhance brain regeneration.

## Boost Athletic Performance

Athletes use NAD+ IV therapy to boost energy levels, improve cognition, and increase reaction times. NAD+ may also assist in muscle development and muscle repair.

## Overcome Addiction

NAD+ can flush drugs out of the body, curb the cravings for opioids and alcohol, and reduce withdrawal effects.
